French Healthcare Registration

Essential Checklist

Use this checklist to organise your healthcare registration. The documents required and the applicable procedure depend on your individual circumstances, so check current Assurance Maladie information before submitting anything.

Before Applying

- ■ I understand the basis on which I am seeking French healthcare coverage.
- ■ I know which healthcare procedure or CPAM applies to my situation.
- ■ I have checked the current official Assurance Maladie information.
- ■ I have identified the current application form where one is required.
- ■ I have checked the supporting documents relevant to my situation.
- ■ My identity documents are ready.
- ■ My residence or status documents are ready.
- ■ I have prepared any other supporting documents relevant to my situation.

Submitting the Application

- ■ I have completed the current application form carefully.
- ■ My information is consistent across the documents.
- ■ I have kept a complete copy of the application.
- ■ I have kept copies of the supporting documents.
- ■ I have kept proof of submission.
- ■ I have recorded the date of submission.
- ■ I have recorded any reference number or identification number I receive.

After Submission

- ■ I know how to check or follow up on my application.
- ■ I have kept all correspondence from Assurance Maladie / CPAM.
- ■ I understand that identification and the opening of rights can involve different stages.
- ■ I understand that a Carte Vitale comes after the relevant registration and identification steps.
- ■ I know what to do if additional documents are requested.

■ I have considered whether complementary health insurance (mutuelle) is relevant to my situation.

HumaForm Tip ■
The Carte Vitale is not usually the starting point. First make sure your healthcare rights and identification are properly established, then follow the next steps indicated by Assurance Maladie.

Keep this checklist with your administrative documents and update it as your situation changes.

General organisational resource only. Healthcare rules and procedures can change. Always verify current requirements with Assurance Maladie or the relevant official authority.
